---

Hello: I am excited to share the vacancy announcements ([here](#) and [here](#)) for the [NOAA Fisheries Northwest Fisheries Science Center \(NWFSC\)](#) Deputy Science Center Director. This is an impactful, meaningful, and high profile leadership role that directly oversees the NWFSC's science and administrative portfolio. The diverse science portfolio includes biology, economics, genetics, chemistry, ecology, data science, physiology, toxicology, and more. NWFSC [science](#), in turn, supports an even more diverse range of natural resource management including federally managed fisheries, conservation related to the Endangered Species Act and other federal mandates, aquaculture, and more. The administrative portfolio includes information technologies, facilities, [budgeting](#), [human resources](#), and more. In all, the NWFSC includes [approximately 260 federal employees](#) and an approximate \$80m annual budget.

I encourage leaders with proven leadership and management acumen in or related to public sector science agencies to consider this opportunity. If you have questions about this opportunity, please feel free to contact me or the retiring [incumbent](#), Mark Strom (CCed here).

Please circulate widely.

Thanks,  
Kevin
