# Looking for M.Sc and Ph.D students

*New microbial research*

## Microbes and aggerates: from marine to freshwater environments

The project integrates advanced laboratory experiments to field studies in marine and freshwater environments

Lab-scale experiments will be carried at the Sade Boker Campus, Ben Gurion University of the Negev, Israel

Priority will be given to students with former background in microscopy, flow cytometry and bioinformatics

**High scholarships will be granted accordingly**

You can join the project in August as interns
